

 **Concertina** *Compress*

Concertina Compress

3.0 meter

2.7 meter

Introduction:

The Concertina Compress bag is ideal for hike-n-fly or travel. Designed to be extremely lightweight at only 200g. The unique new folding and compression system not only helps to save packing space in your rucksack but works to improve the rigidity of the rucksack for a better hiking experience.

The Concertina Compress bag works with all GIN lightweight gliders. There are 2 sizes, 3.0 and 2.7 meters, depending on the size and model of the pilots glider and the desired level of compression.

NOTE: Not intended for glider storage.

Concertina Compress

Large Gliders

Gliders with a longer cord length than the compress bag can still be used. One extra step is needed to first fold the trailing edge to fit inside the bag.

Designed for:

The Concertina Compress bag can be used with any lightweight glider. The volume of the compress bag may be too small to be used with regular gliders. High performance gliders may be damaged if compressed depending on the pilots needs.

Glider cord length	Recommended Compress bag
Yeti4 XXS 2.7m Yeti4 XL 3.3m	2.7m bag 3.0m bag (possible to fit in 2.7 with extra folding)
Atals Xalps XS 2.7m Atlas Xalps XL 3.1m	2.7m (possible) 3.0m recommended (larger leading edge)
Explorer XXS 2.2m Explorer L 2.6m	2.7m bag
Sprint 3 XXS 2.4m Sprint 3 XL 2.95m	2.7m (depends on leading edge) 3.0m bag (possible*) *not tested
