

::: GIN Mini glider assembly instructions :::

1

Remove the plastic bar and feed the wire through the tip hole.

2

Push the wire through all the front holes on the ribs inside the glider near the top surface.

3

Fix the wire in one side of the plastic bar in the small groove in the bar as shown.

4

Place the plastic bar back in its sleeve with the wire seated in the groove of the plastic bar.

5

Do the same on the other side.

6

Mission complete!
